Beijer Electronics joins Emerson's DeltaV Alliance Program

Beijer Electronics becomes DeltaV Silver Alliance member.

People & Technology. Connected.

Since the start in 1981, Beijer Electronics has been headquartered in Malmö, southern Sweden and is one of three business entities within the listed BEIJER GROUP.

Over the years, Beijer Electronics has expanded internationally, and is represented in Europe, Asia and the Americas through proprietary offices. Sales and support resources are located in all three regions. Maintaining a long-term local presence is an important part of Beijer Electronics' growth strategy.

The vision of Beijer Electronics states: "Beijer Electronics is a multinational, cross-industry innovator that connects people and technologies to optimize processes for business-critical applications. As experts in user-friendly software, hardware and services for the Industrial Internet of Things, we empower you to meet your challenges through leading-edge solutions."

Emerson's DeltaV™ Alliance Product Program focuses on attracting and collaborating with best-in-class companies. The third-party product referencing program aims to ensure product interoperability and formal support and stability of deployed solutions, leading to reduced risk, cost, and implementation time for Emerson customers.

Alliance program members are selected because they are recognized market leaders and deliver best-in-class products, services and expertise. Only the products that provide the highest value and have been through Emerson's strict approval process are added to the program.

"Emerson has been a long-term partner with Beijer Electronics and we are very excited to be part of DeltaV Silver Alliance program starting in 2019. This partnership will provide solutions to Emerson that meet rugged requirements with outstanding customer support," says Stefan Lager, CEO of Beijer Electronics.

"We are happy to add next generation industrial HMIs from Beijer Electronics into our DeltaV alliance program portfolio to provide a wide range of options to meet our customers' HMI solution needs" says Rahul Gadkari, Director of DeltaV Alliance Product Program for Emerson's process systems and solutions business unit.
